

# WE MAKE UNIQUE SOLUTIONS HAPPEN

MSS DATA SOLUTIONS

# WITH YOU AT EVERY STEP

MSS Data Solutions is the established market leader in fibre optic design and innovation for communications cabling, providing unique, end-to-end solutions for the needs of any project in enterprise, industrial and telecommunications industries.

We equip businesses and unleash their potential by devising personalised solutions for entire projects - from invention, design and manufacture to transmission, distribution and ongoing support.

Combining our complete range of high quality fibre optic and communication products with end-to-end service and industry-leading international partners brings the ultimate in big picture solutions.

## OUR SOLUTIONS

### OUR INNOVATIONS

#### FIBRE SOLUTIONS

Our comprehensive portfolio of products complete any fibre optic cabling system. From cable, patch panels, patch cords and connectors to splicers and test equipment, we can provide a solution for all your needs.

#### COPPER SOLUTIONS

Our complete range of copper cabling products are all perfectly matched for unrivalled system performance.

#### RACKS & CABINETS

Our extensive range of racks, wall mount cabinets and associated accessories are robust and manufactured fully assembled for shipment, saving our customers cost and time onsite.

### OUR GLOBAL PARTNERS

As pioneers and innovators in test monitoring and analytics for the communications industry, EXFO are number one in fibre optic test solutions with 95% of the top communications service providers (CSPs) worldwide using their solutions.

As leaders in network test, visibility and security solutions, Keysight Technologies address the fastest-growing communications and networking trends including 5G, IoT, security, cloud, and application performance.

INNO Instrument builds optical communication and connects the world by developing, producing and providing reliable splicing technology.

Allot is a leading, global provider of innovative network intelligence and cutting-edge security solutions for communications service providers (CSPs) and enterprises.

# PARTNER WITH US

Our **national team** of technical specialists, engineers and business development managers are on hand for local support, using their in-depth knowledge to **individually customise solutions** which assists you in completing your projects faster, more efficiently and to the highest possible standards.

Our Melbourne-based **engineering and production facility** is certified to ISO 9001 and utilises the latest technology to manufacture pre-terminated cables and cable assemblies as well as provide **innovative solutions** across fibre splicing and test and measurement products.

Our **national distribution network** means your deliveries will arrive on-time from our regional warehouses across Australia and New Zealand.

Products are ACMA registered, incorporating **A-Tick and C-Tick safety**, and provide the reassurance of a 25-year warranty on registered products.

By collaborating with leading international experts, we harness the most up-to-date **technical expertise** to directly benefit our customers.

# EXPERIENCE, EXPERTISE AND INNOVATION... FROM START TO FINISH.
